Marketing Materials Company Overview

JFB HART COATINGS IS THE LEADING DEVELOPER AND MANUFACTURER OF ENVIRONMENTALLY FRIENDLY, WATER-BASED, SOLVENT-FREE URETHANE AND EPOXY COATINGS. With more than 100,000,000 sq. ft. of product installed, JFB Hart Coatings has provided next generation paints and coatings for superior protection to all indoor and outdoor applications. JFB Hart Coatings presents customers the ability to use sustainable and green products while enhancing performance characteristics.

JFB Hart Coatings continues to develop, specialize and enhance our technology to meet consumer requirements and to stay ahead of constantly evolving government regulations. In addition, JFB Hart Coatings continues to work with the South Coast Air Quality Management District (“SCAQMD”) of Southern California to ensure commercial availability of high performance, environmentally friendly paints and coatings in the marketplace that exceed the SCAQMD’s regulations.

Historically, relatively harsh petroleum-based solvents were used for paints and coatings, thus resulting in coatings that were harmful to the environment. JFB Hart Coatings is changing the industry by providing environmentally friendly paints and coatings with attributes such as **Low to Zero VOCs, LEED Credits (EQ. 4.2 Low Emitting Coatings), Low to No Odor, Sustainable & Green, Reduces Solid Waste, Water & Electrical Usage and Contains No Proposition 65 Chemicals.**

JFB Hart Coatings is shaping the industry by delivering two key features in a single product: 1) outstanding, protective performance characteristics and 2) low to zero VOCs in solvent-free formulations. JFB Hart Coatings also use Microban’s Antimicrobial Protection Additives to inhibit the growth of microorganisms such as bacteria, mold and mildew.

INDUSTRIAL MAINTENANCE

JFB Hart Coatings has developed industrial maintenance products that have protective properties and are formulated to withstand extreme conditions. These products include HP-105, HP-1K, HP-300 Matte, HP-300 Satin and HP-330. JFB Hart Coatings products provide many benefits to the consumer, including:

- **Eliminates Labor Steps**
- **Less Coats & No Primer Required**
- **Excellent Bonding Capabilities**
- **Ultraviolet Insensitivity**
- **Anti-Graffiti Systems**

The Industrial Maintenance Products are used in theme parks, sports arenas, warehouses, building interiors and exteriors, roofs, waste water facilities, anti-graffiti systems, transportation facilities, food / beverage / pharmaceutical plants, airports and train stations, hospitality, restaurants, wineries and many more markets.

ULTRA DURABLE FLOORCARE

JFB Hart Coatings has been the industry leader in manufacturing Ultra Durable Floor Care Products for the facilities maintenance industry. These products include GlossTek™, GlossTek™ Fast Dry, MatteTek™, SatinTek™ and VersaTek™.

JFB Hart Coatings products eliminate a half century old acrylic finish technology. Our Ultra Durable products provide many benefits to the consumer, including:

- **Reduces Floor Care Costs by 40-80%**
- **Eliminates Burnishing, Stripping and Scrub & Recoats**
- **Superior Durability and Chemical / Abrasion Resistance**
- **Overall Better Protection for Floors**

The Ultra Durable Products are used in facilities spanning healthcare, education, retail, office buildings, government, airports and train stations, theme parks, restaurants, sports arenas, churches, hospitality, restaurants, prisons, kitchens, gymnasiums, and many more.

SPECIALTY PRODUCTS & OEM APPLICATIONS

The versatility of JFB Hart products enable them to be used in a wide variety of applications in specialty / OEM markets. JFB Hart Coatings has either developed or enhanced existing products based on customer requests for specific applications, including:

- **A UV cured product for vinyl flooring manufacturers to factory apply.**
- **Antimicrobial products to inhibit the growth of microorganisms such as bacteria, mold and mildew (“Plus MB” technology).**
- **Industrial transport / vehicle applications for OEM and aftermarket to deliver extreme durability and non-stick performance.**
- **Products used for tables, countertops and furniture that withstand household chemicals, wear and tear, as well as coatings for substrates with extreme adhesion or flexibility requirements.**

Marketing Materials

Key Advantages & Benefits

- ***Eliminate Burnishing, Buffing, Scrubbing, Strip & Recoats***
 - Significant cost savings – redirect labor to other tasks – reduce waste and electrical usage
- ***Microban Antimicrobial Protection***
 - Using products that inhibit the growth of microorganisms such as bacteria, mold and mildew help prevent the spread of germs
- ***Sustainable & Green Products***
 - Providing a healthy and friendly environment for patrons, staff and visitors
- ***Long Lasting Products***
 - The products have excellent durability which provides great looking floors all day every day
- ***Increased Slip Resistance***
 - Reducing the risk for slip and falls
- ***Operational Interference***
 - Less disruption for the facilities

Marketing Materials

Key Environmental Advantage

- ***Produced in Total Water***
 - 100% water-based coating without the use of co-solvents
 - Not a “watered-down” solvent coating
- ***Virtually Odorless***
 - Does not require special breathing apparatus
 - No free monomers above OSHA and other safety thresholds
- ***Contain No Proposition 65 Chemicals***
- ***Meet all Federal, State, and Local Government Agency VOC Regulations (SCAQMD, CARB, EPA, etc.)***
 - All products are less than 100 g/l VOCs
- ***Meet U.S. Building Councils’ LEED Criteria***
 - Low emitting Paints & Coatings (EQ – 4.2)
- ***California Building Code of Regulations Title 24 Part 11 Compliant***
 - Chapter 4 & 5 contain VOC content limits
 - Limits come from SCAQMD regulations

Marketing Materials

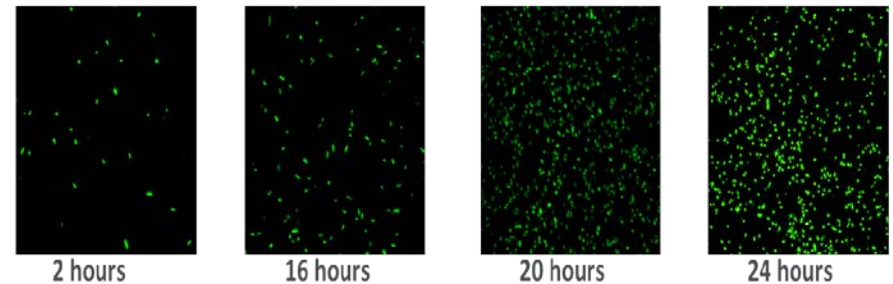

Antimicrobial Protection

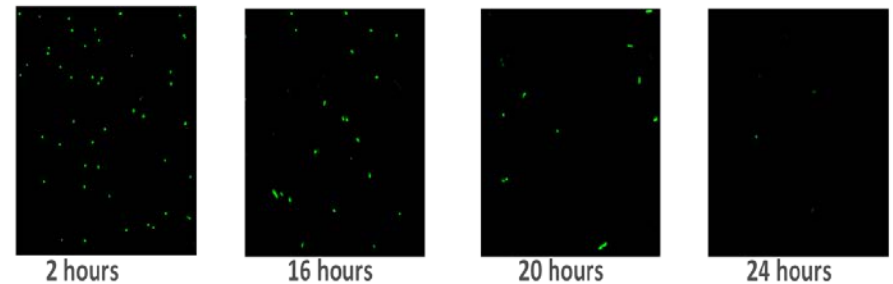

Plus MB™ Antimicrobial Technology - Microban® antimicrobial product protection

- According to the Center for Disease Control guidelines, when floors are cleaned with a disinfectant, “a few hours after floor disinfection, the bacterial count was nearly back to the pretreatment level.”
- JFB Hart has partnered with Microban® Antimicrobial Product Protection (“plus MB”) to provide the most innovative coatings with biostatic antimicrobial protection.
- The “plus MB” technology inhibits the growth of microorganisms such as bacteria, mold and mildew.
- The “plus MB” technology is built-in to the coating during manufacturing which allows the antimicrobial protection to last as long as the coating lasts.
- JFB Hart believes this biostatic antimicrobial protection, in combination with disinfectant cleaning, helps provide an important defense against microorganisms that may be associated with the spread of infections.

Unprotected Surface

JFB Hart Product with Microban® Antimicrobial Protection

This information is based upon standard laboratory tests and is provided for comparative purposes to substantiate antimicrobial activity for non-public health applications. Microban technology is not designed to replace good hygiene practices or protect users from disease causing microorganisms. Antimicrobial action limited to product surface.

For additional information visit Microban's website at:
<http://www.microban.com/>

LEED, or Leadership in Energy and Environmental Design, is an internationally recognized mark of excellence that provides building owners and operators with a framework for identifying and implementing practical and measurable green building design, construction, operations and maintenance solutions.

LEED-certified buildings are designed to:

- Lower operating costs and increase asset value
- Reduce waste sent to landfills
- Conserve energy and water
- Be healthier and safer for occupants
- Reduce harmful greenhouse gas emissions
- Qualify for tax rebates, zoning allowances and other incentives in hundreds of cities

Facilities using JFB Hart products can obtain LEED credit points for the following categories:

- IEQ Credit 4: Low Emitting Coatings
- A facility can obtain LEED credit points by using JFB Hart products on flooring, wall and ceiling finishes and exterior applied finishes (coatings and roofing)
- JFB Hart products meet the South Coast Air Quality Management District VOC regulations in rule 1113/1168

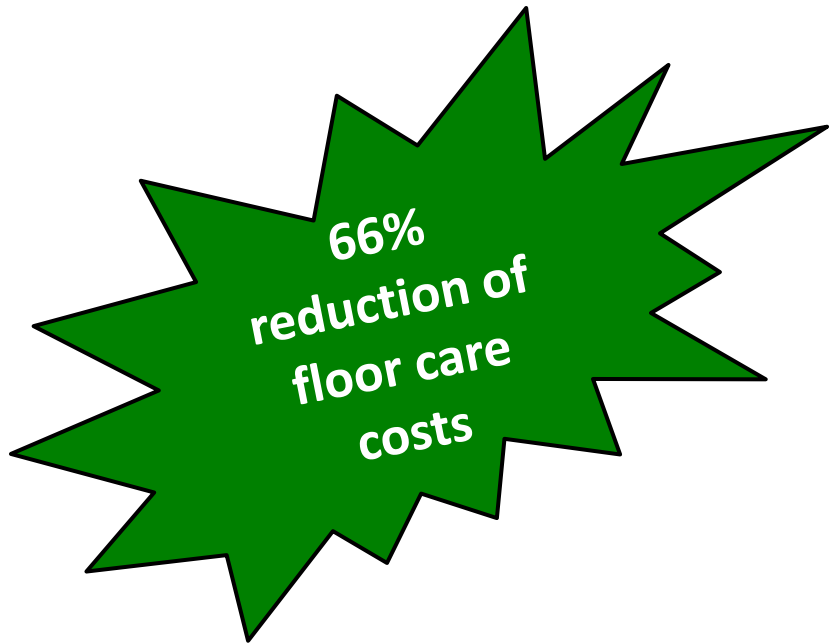

Save Over 66% on Your Total Floor Care Costs

Labor costs
decreased by **96%**

+

Material costs
decreased by **29%**

=

Basic Assumptions (of conventional):

- Sq. ft. of facility: 1,000,000
- # of burnishes per week: 3
- # of scrub/recoats per year: 4
- # of strip/recoats per year: 1

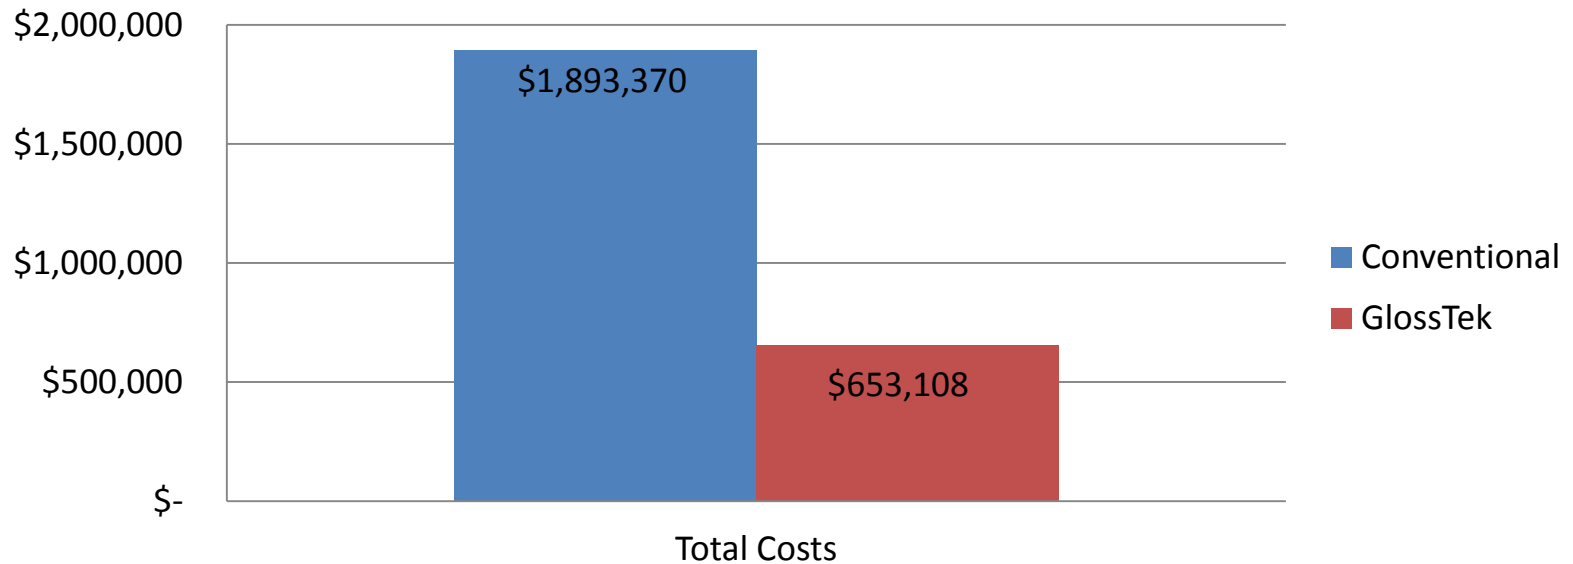

Basic Assumptions (of GlossTek):

- Sq. ft. per gallon: 400
- Cost per gallon: \$225
- Recoat every: 36 months

Marketing Materials Cost Savings

Total 3 Year Cost Comparison

Cumulative Three Year Savings (cost per sq. ft.)

	Labor	Materials	Total Costs
Conventional	\$1.02	\$0.87	\$1.89
GlossTek	<u>\$0.04</u>	<u>\$0.61</u>	<u>\$0.65</u>
Cumulative Savings	\$0.98	\$0.26	\$1.24
Savings Percent	96%	29%	66%

Marketing Materials Products

All JFB Hart Ultra Durable Floor Care Products come packaged in individual gallon and quart sized kits. Each kit contains 2-3 separate components which are easily mixed together just prior to application, following instructions included with each kit. A one gallon kit will cover about 350 – 400 square feet of flooring.

Product	Dry Time	Pot Life	Gloss Level	VOCs
GlossTek	8 hrs.	90 min	Gloss (>85°)	<30 g/l
GlossTek Fast Dry	4 hrs.	45 min	Gloss (>85°)	<50 g/l
MatteTek	6-8 hrs.	90 min	Matte (25°)	<50 g/l
SatinTek	6-8 hrs.	90 min	Satin (55°)	<50 g/l
VersaTek	6-8 hrs.	90 min	Gloss (>85°)	<20 g/l

Additives:

- **GripLok** – to increase slip co-efficient of friction; reduces gloss to a matte finish
- **Accelerator** – to shorten the dry time by 50% - 75%
- **Adhesion Plus** – to increase adhesion strength to hard surfaces such as ceramic
